RE: Studio Internship Application

Dear Ms. Solomon,

As an artist who also records and mixes vocals, I understand how personal it is to trust someone with your sound. That perspective motivates my interest in Blackbird Studio's internship program, which I found through your website. The opportunity to support your team while developing my recording skills would be a meaningful next step in my career.

My Audio Technology studies at SAE Institute Nashville, with expected completion in December 2026, have given me practical experience in recording, editing and mixing. My work with Ableton Live and Pro Tools includes vocal recording, session organization and audio processing. As a production assistant at The Hooked Show, I also help coordinate guests and support the team during live productions. These experiences have strengthened my communication skills and taught me to stay attentive when other people depend on my work.

Blackbird interests me because it brings technical expertise and creative expression together across different musical styles. Learning that Studio C has hosted artists such as The Weeknd made the studio especially relevant to my interests in vocal production. As an intern, I would bring an artist's perspective, careful listening and a willingness to handle the everyday tasks that help sessions run smoothly. Learning from experienced engineers while contributing dependable support is exactly the opportunity I am seeking.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my skills and enthusiasm could contribute to Blackbird Studio's team!

Sincerely,

Daniil Germanchuk
